DETAILED ACTION

Allowable Subject Matter

Claims 1 – 48 and 50 – 56 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 1, 2, 8, 10, 11, and 27 – 53, reasons for allowance were indicated in the previous Office Action (mailed March 10, 2005). Regarding claims 3, 9, and 12, the prior art does not disclose the use of performing an amplitude conversion process on the envelope for reducing an amplitude difference in the envelope and determining dividing positions on the basis of differentiated results of the envelope subjected to the amplitude conversion process. The Examiner notes that the prior art produces square wave (or pulse train) signals from envelopes, which effectively eliminates any amplitude differences (for example, see Yamada's fig. 6D). However, this method would not allow meaningful results to come from a "differentiated result" as claimed. Thus, the Examiner notes the importance of Applicant's "reducing" (i.e., not "eliminating"). The Applicant has clarified this process in specification paragraph [0146], which states: "...the edge portions may be detected by any other suitable filter process that is arranged to generate values corresponding to envelope inclinations. For example, there may be performed a filter process for simply differentiating the envelope levels, and a low-pass filter processes for processing the differentiated results." [Emphasis added] The square wave (or pulse train) method of the prior art would not would not generate values corresponding to envelope inclinations. Regarding claims 13, 18, 23, 24, 25, and 26, the prior art does not disclose the use of identifying sections and

extracting a rise position within one section and providing a correspondence with another presumed beat position in another section. Regarding new claims 54 and 56, the prior art does not disclose the use of starting a performance based on the "expansion/contraction rate of a tempo."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
